BRYAN JONATHAN

Tangerang, Indonesia | bryanjonathan201@gmail.com | github.com/BryanJth | linkedin.com/in/bryan-jonathan-871916247/

Data Scientist and recent Mathematics graduate from Universitas Indonesia, BNSP-certified in data science. Hands-on work across computer vision, supervised learning, RAG, and Python automation. Evaluated ConvNeXt-KAN classifiers, built a PDF-grounded chatbot, and automated a data-validation process from 15 minutes to 2 minutes at Astra Credit Companies.

TECHNICAL SKILLS

Programming: Python, R, SQL (SQLite, MySQL), Excel, Git/GitHub, Power BI

Machine learning: PyTorch, torchvision, TensorFlow/Keras, scikit-learn, pandas, NumPy, classification, CNNs, LSTMs, cross-validation, model evaluation

AI applications: Flask, LangChain, ChromaDB, Sentence Transformers, Gemini API, RAG, vector search

PROFESSIONAL EXPERIENCE

Data Intern, Brand Management Retention | Astra Credit Companies | Mar–Sep 2026

- Automated SOLVE package record validation across multiple data sources using Python, reducing processing time from 15 to 2 minutes (approximately 87%).
- Produced and validated cumulative daily application-status and weekly F9PD Excel reports, processing over 47,000 source rows at month-end.
- Maintained a SharePoint-hosted dashboard monitoring targets, actuals, carry-over, and product trends across 77 branches in six areas.

Assistant Lecturer, Calculus 3 | Universitas Indonesia | Aug 2024–Jan 2025

- Mentored 76 students across nine sessions; contributed to a 20% improvement in class-average exam scores.
- Designed 90+ supplementary practice problems and provided detailed assignment feedback.

SELECTED PROJECTS

ConvNeXt-KAN Image Classification | Undergraduate Thesis, 2026

- Compared KAN versus MLP classification heads on a frozen pretrained ConvNeXt-Tiny backbone (CIFAR-10) across 10 runs. Mean final test accuracy: 94.84% (KAN) vs 94.65% (MLP).
- Deployed a Dockerized Flask app for image upload and side-by-side model prediction probabilities.

PDAM Customer Tariff Classification for Audit Prioritization | Aug 2026

- Cleaned 10,000 customer records spanning 13 tariff classes; compared logistic regression and random forest with stratified 5-fold cross-validation, achieving 99.61% held-out Macro F1.
- Translated prediction mismatches into candidates for manual tariff audits rather than automated billing changes.

Veritas: UI Campus Assistant | Dec 2025

- Built a Python/Flask RAG chatbot using Gemini, institutional PDFs, multilingual embeddings, and Chroma vector search; supported multi-session conversations.

East Java Poverty Determinants — Spatial & Machine Learning | Jun 2025

- Modeled 38 districts/cities using OLS, spatial lag/error models, and Spatial Random Forest. Spatial Random Forest achieved R^2=0.687, RMSE=1.042.

East Java Poverty Analysis Using GWR | Apr 2025

- Compared OLS and three GWR kernels; Bisquare GWR improved AIC from 166.38 to 157.26 and R^2 from 0.808 to 0.823.

Sales & Order Management Database | Jun 2025

- Built a six-table SQLite database and Python GUI supporting CRUD queries, inventory updates, checkout, and reporting.

EDUCATION & CREDENTIALS

Universitas Indonesia — B.Sc. Mathematics, GPA 3.30/4.00 | Jun 2022–Aug 2026

BNSP Certified Data Scientist | Oct 2026–Oct 2029

TOEFL ITP (ETS): 640/677 | Jul 2026

Organization: OIM MATEK 2023 — Poster Competition Committee Staff | Jul–Dec 2023
